

Landing page build steps for Elementor

One page, fourteen sections, top to bottom. Every value below is the exact number from the approved design. Follow the steps in order — each one finishes a section you can see on the page before you move on.

Built for
Elementor Pro 4.1.2

Steps
14

Content width

This rebuilds the approved static mockup inside the clinic's WordPress. The mockup itself is live at mysense-my.github.io/lumiere-dental-kota-warisan — keep it open on a second screen while you build, it is the reference for anything this guide does not spell out.

What you are building

Step	Section	How
1	Page setup and menu	Page settings
2	Header	Widgets + 6 lines CSS
3	Hero	Widgets + 1 paste
4	Our Panels	Widgets
5	Why Lumiere	Widgets
6	Dr Tan biography	Widgets + 1 line CSS
7	Stats counters	Counter widget
8	Services × 8	Widgets + 1 line CSS
9	Our Clinic	Widgets + 1 line CSS
10	How It Works	Widgets + CSS
11	Patient Stories	Widgets
12	FAQ	Accordion widget
13	Contact	Widgets + 1 paste
14	Footer + WhatsApp button	Widgets

Three rules that apply to every step

- **No Site Settings globals.** Every widget is styled directly, with the hex values written in these tables. Nothing depends on a global colour or font.
- **Name every container** in the Structure panel the moment you create it, using the name in the tree diagram. Nested containers are impossible to re-target otherwise.

- **Build one, then duplicate.** Where a block repeats, build the first one completely, then right-click → Duplicate and change only the content.

Before you start

Upload the images

All 22 files are in `Lumiere Kota Warisan / assets`. Upload them to **Media > Add New** in one go. They are already cropped and compressed — do not resize them, and always pick **Image Resolution: Full** when you place one.

File	Size	Used in
<code>logo-gold.png</code>	734×746	Header, footer
<code>favicon.png</code>	128×128	Site icon
<code>hero-lobby.jpg</code>	2000×1500	Hero background
<code>panels/pmcare.png</code> + 4 more	various	Step 4 panel logos
<code>team-neon.jpg</code>	1400×1050	Step 6 Dr Tan block
<code>dr-tan.jpg</code>	180×180	Step 6 portrait circle
<code>icons/general.png</code> + 7 more	95×95	Step 8 service pills
<code>svc-scaling.jpg</code> + 7 more	1600×1200	Step 8 service photos
<code>lobby-reverse.jpg</code> , <code>reception.jpg</code>	1400×1050	Step 9 landscape cards
<code>kids-corner.jpg</code> , <code>neon-wall.jpg</code>	1050×1400	Step 9 portrait cards
<code>team-reception.jpg</code>	1400×1049	Step 11 featured review

Why the sizes matter. Every card in this design is shaped to its image's own ratio so nothing is cropped. The service photos are all exactly 4:3 and the Step 9 cards are 4:3 or 3:4 on purpose. If you swap in a differently shaped photo later, change that card's `aspect-ratio` to match it.

The palette, in one place

Use	Hex	Where
Headings	<code>#1F2833</code>	Every H1 / H2 / H3
Body text	<code>#5A6270</code>	Every paragraph
Buttons	<code>#33485C</code> → hover <code>#26394B</code>	All primary buttons
Eyebrows, icons	<code>#8F702A</code>	Section labels, icon glyphs
Icon tile / pill fill	<code>rgba(212, 178, 96, .16)</code>	Behind every icon
Page background	<code>#FAF9F5</code>	Page, footer bottom
Cards	<code>#FFFFFF</code>	All white cards
Card trays	<code>#E9E6DD</code>	The grey frame behind card groups
Hairlines	<code>#E6E2D6</code>	Borders and dividers
Stars	<code>#F0B428</code>	Review ratings
WhatsApp green	<code>#25D366</code>	Floating button

Type scale

Element	Desktop	Tablet	Mobile	Weight / spacing
H1 (hero)	56	46	33	600 · line 1.2 · letter –2.5px
H2 (sections)	46	38	29	600 · line 1.22 · letter –0.9px
H3 (cards)	20	20	20	600 · line 1.3
Body	16	16	16	400 · line 1.4
Eyebrow	15	15	15	500 · colour #8F702A

Elementor writes letter-spacing in px, not em. The values above are already converted — type them exactly as shown.

Two prerequisites before any widget goes on the page.

1a · Create the menu

The header links jump to anchors on this one page, so the menu is built from Custom Links. Go to **Appearance > Menus**, create a menu called **Lumiere Landing**, and add six Custom Links. Leave every "Navigation Label" exactly as written.

URL	Navigation Label
#home	Home
#about	About
#services	Services
#reviews	Reviews
#faq	FAQ
#contact	Contact

Do not tick any Display Location. This menu is only ever pulled in by the Nav Menu widget in Step 2.

1b · Create the page

Pages > Add New, title it **Dental Pain? Get Expert Care in Kota Warisan**, then **Edit with Elementor**.

Open **Page Settings** (the gear at the bottom-left of the panel):

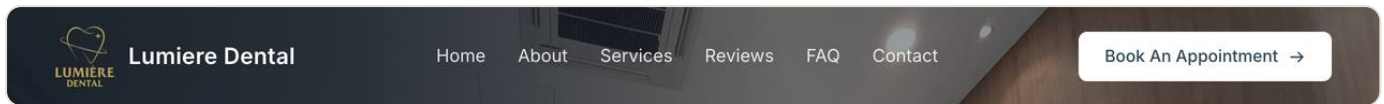

Tab	Setting	Value
Settings	Page Layout	Elementor Canvas
Settings	Hide Title	On
Style	Background Type	Classic
Style	Background Color	#FAF9F5

Elementor Canvas drops the theme's own header and footer. That is deliberate — this page carries its own header (Step 2) and footer (Step 14), which is what makes it work as an ads landing page.

1c · One setting that saves you later

Three sections in this build use CSS `position: sticky`. Sticky dies the moment any parent container has its overflow set to hidden. So as a habit, whenever you create a container in this build, check **Advanced > Layout > Overflow** is left on **Default** unless a step explicitly tells you to set Hidden.

Done when: an empty canvas with a warm off-white background, and a "Lumiere Landing" menu sitting in Appearance > Menus.

The header sits over the hero photo, transparent, and turns solid white once you scroll past the hero.

```
Container header Full width · sticky
├ Container header-inner Boxed 1250 · row · space-between
│   ├── Container brand row · gap 13
│   │   ├── Image logo
│   │   └── Heading brand-name
│   ├── Nav Menu main-nav
│   └── Button nav-cta
```

Container header

Elementor adds the class `elementor-sticky--effects` once it starts sticking. The CSS at the bottom of this step uses that to swap the colours.

Tab	Setting	Value
Layout	Content Width	Full Width
Layout	Direction	Column
Advanced	Padding	Top 0 Right 0 Bottom 0 Left 0
Advanced	Z-Index	100
Advanced	Motion Effects › Sticky	Top
Advanced	Sticky On	Desktop, Tablet, Mobile

Container header-inner

Tab	Setting	Value
Layout	Content Width	Boxed
Layout	Width	1250
Layout	Direction	Row
Layout	Justify Content	Space Between
Layout	Align Items	Center

Style	Dropdown › Background	#FAF9F5
Style	Toggle Button › Color (Normal)	#FFFFFF

Button nav-cta

Button alignment lives in **Style › Button › Position** in Elementor 4.x, not on the Content tab.

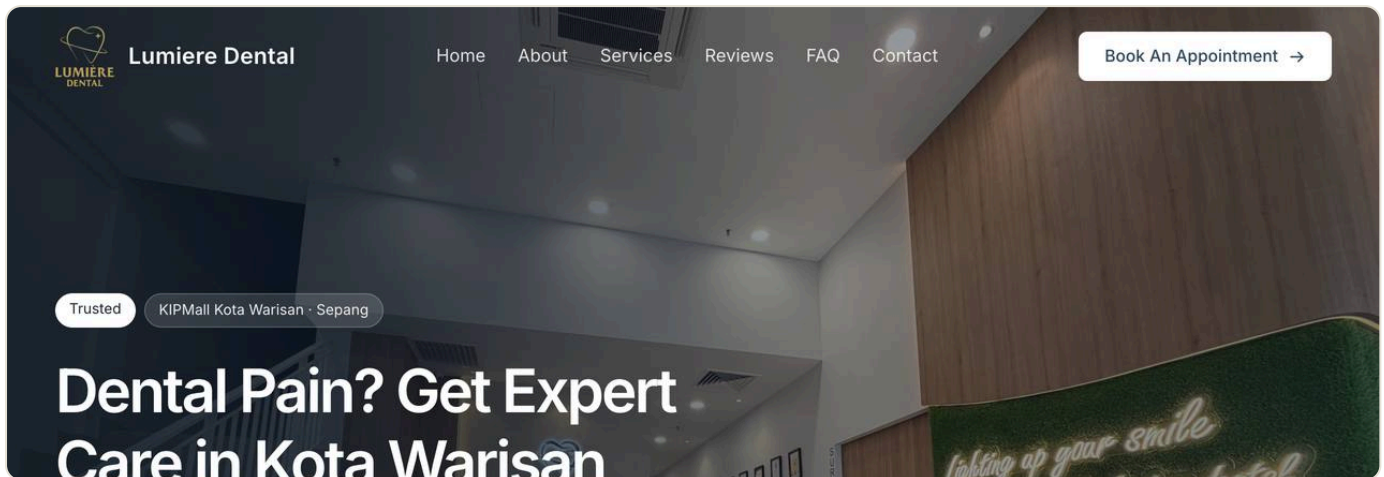

Tab	Setting	Value
Content	Text	Book An Appointment
Content	Link	The WhatsApp URL on the last page of this guide
Content	Icon	Arrow Right · Position After
Style	Typography	Inter · 15.5px · weight 500
Style	Text Color (Normal)	#33485C
Style	Background (Normal)	#FFFFFF
Style	Text Color (Hover)	#1F2833
Style	Background (Hover)	#E8D397
Style	Border Radius	8
Style	Padding	Top 13 Right 24 Bottom 13 Left 24

The scrolled state

Select the **header** container → **Advanced** > **Custom CSS** and paste this. It is the whole "turns white on scroll" behaviour.

```
selector.elementor-sticky--effects{
  background:rgba(250,249,245,.93);
  backdrop-filter:blur(12px);
  box-shadow:0 1px 0 #E6E2D6, 0 8px 24px -18px rgba(31,40,51,.25);
}
selector.elementor-sticky--effects .elementor-heading-title,
selector.elementor-sticky--effects .elementor-item{color:#1F2833!important}
selector.elementor-sticky--effects .elementor-button{background:#33485C!important;color:#fff!important}
```

Done when: the header is invisible against the page until you scroll, then fades into a white bar with dark links.

Full-height hero. The photo is the clinic lobby with a dark gradient washed across it so white type stays readable.

```
Container hero Full width · min-height 100dvh · bg photo
└ Container hero-inner Boxed 1250 · column · align start
  └ Container hero-badges row · gap 8
    └ Heading badge-trusted
      └ Heading badge-place
    └ Heading hero-h1
    └ Heading hero-sub
    └ Container hero-actions row · gap 12
      └ Button btn-book
      └ Button btn-services
    └ HTML hero-proof ← paste file
```

Container **hero**

Set **Min Height 100 VH** in the panel, then the one-liner below upgrades it to **dvh** so mobile browsers do not leave a gap where the address bar was.

Tab	Setting	Value
Layout	Content Width	Full Width
Layout	Direction	Column

Style	Border Radius	8
Style	Padding	Top 12 Right 22 Bottom 12 Left 22

The rating row

Drop an **HTML** widget under the buttons and paste **Step 03 - Hero proof.html** into it. It is the four initial circles plus the five stars and "Rated 5.0 on Google Reviews" — six lines, and far quicker than stacking overlapping widgets by hand.

Mobile

Switch to the **Mobile** device view and set **hero-actions** → Layout › Direction to **Column**, and Align Items to **Stretch**, so the two buttons go full width and stack. This does not affect desktop.

Done when: the hero fills exactly one screen height on your laptop and on a phone, with no scrollbar inside it.

The grey tray with one white card per insurer is the pattern repeated in Steps 5, 7, 11, 12 and 13. Build it carefully once.

```
Container panels          Boxed 1250 · column · align center
├ Container sec-head      column · align center · max 640
│   ├── Heading eyebrow

Style	Border Radius	12

The card heading is Inter 19.5px / 600 / #1F2833 with Margin **Top 30 Right 0 Bottom 0 Left 0**; the paragraph is Inter 15px / #5A6270 with Margin **Top 10 Right 0 Bottom 0 Left 0**. Build card one, duplicate three times, then fill in:

Icon	Heading	Text
Tooth	Painless-first dentistry	Gentle techniques from airflow scaling to careful extractions, so treatment stays calm from start to finish.
User	Led by Dr Tan Mei-Wen	DDS from MAHSA University with Distinction, plus a postgraduate diploma in clinical orthodontics.
Heart	Family-friendly clinic	A dedicated kids corner and unhurried appointments make first visits easy for the little ones.
Shield-check	Insurance panel clinic	A panel clinic for major insurers including AIA, PMCare and Mednefits, with claims handled at the front desk.

Responsive

Tablet: vision-card Width 50% with Wrap on. **Mobile:** Width 100%.

◆ Meet Your Dentist

Dr Tan Mei-Wen

Resident Dentist · Lumiere Dental Kota Warisan

Dr Tan graduated with a Doctor of Dental Surgery from MAHSA University in 2016, with Distinction in Conservative Dentistry. She began her career in the government sector at Klinik Pergigian Taman Medan, and chose to extend her time in public service before moving into private practice. She also holds a Postgraduate Diploma in Clinical Orthodontics.

With a strong interest in preserving natural teeth, Dr Tan believes dentistry goes beyond simply treating teeth. She takes a holistic and individualised approach, taking time to understand each patient's concerns, expectations and overall wellbeing when planning treatment.

Her approach centres on clear communication, thoughtful treatment planning and

The photo is shorter than the bio column, so it travels down with you as you read instead of leaving a gap.

```

Container doc-block      row · bg #FFF · radius 16 · pad 10 · gap 10
├ Container doc-photo    radius 12 · overflow hidden · STICKY
│   └ Image team-neon
└ Container doc-body      column · pad 30/34/30/26
    ├── Heading eyebrow
    ├── Container doc-id  row · align center · gap 15
    │   ├── Image dr-tan (circle)
    │   └ Container column
    │       ├── Heading name
    │       └ Heading role
    └ Heading bio ×4
  
```

This block sits inside the same **about** section container, directly under the tray from Step 5.

Container doc-block

Align Items must be Start, not Stretch. On Stretch the photo would be pulled to the full height of the bio and the sticky travel would have nowhere to go.

Tab	Setting	Value
Layout	Direction	Row
Layout	Align Items	Start
Layout	Gap	10
Layout	Width	100%
Style	Background Color	#FFFFFF
Style	Box Shadow	0 10 30 -18 rgba(31,40,51,.25)
Advanced	Border Radius	16
Advanced	Padding	Top 10 Right 10 Bottom 10 Left 10
Advanced	Margin	Top 16 Right 0 Bottom 0 Left 0

Container doc-photo

This is the one container in the build that *should* be Hidden — it clips the photo to the rounded corner. Its parents stay on Default.

Tab	Setting	Value
Layout	Width	45%
Advanced	Border Radius	12
Advanced	Overflow	Hidden

```
selector{aspect-ratio:4/3; position:sticky; top:112px}
```

Inside it, an **Image** widget: `team-neon.jpg`, Resolution **Full**, Style › Width **100%**, Height **100%**, Object Fit **Cover**.

Container doc-body

Tab	Setting	Value
Layout	Direction	Column
Layout	Width	55%
Advanced	Padding	Desktop Top 30 Right 34 Bottom 30 Left 26 · Tablet Top 26 Right 28 Bottom 30 Left 28 · Mobile Top 22 Right 20 Bottom 26 Left 20

Image dr-tan portrait

This is the only file in the pack that is low resolution (180×180 — it is all the group website has). At 68px it is sharp. Do not scale it up.

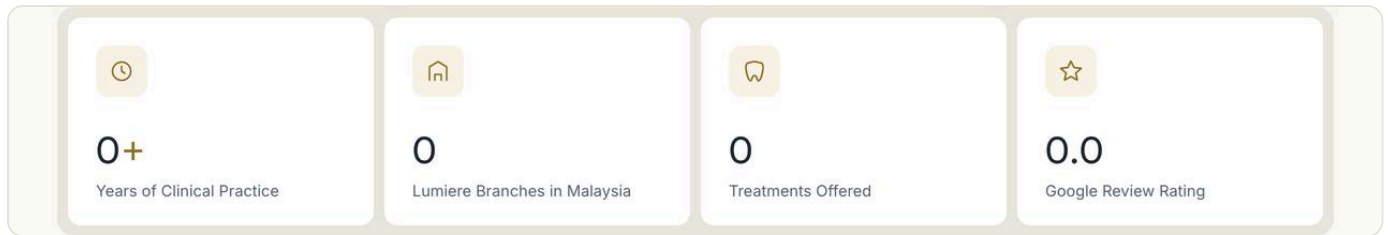

Tab	Setting	Value
Content	Choose Image	<code>dr-tan.jpg</code>
Content	Image Resolution	Full
Style	Width	68px
Style	Height	68px
Style	Object Fit	Cover
Style	Border Radius	50%
Style	Border Type / Width / Color	Solid · 2px · <code>#E8D397</code>

Then: name = **Heading h3**, Inter 23px / 600 / `#1F2833`; role = **p**, 14.5px / `#5A6270`, text *Resident Dentist · Lumiere Dental Kota Warisan*. Below the doc-id container, four Heading widgets (tag **p**, Inter 15px, line-height 1.6, colour `#5A6270`, Margin Bottom 12). The fourth one — the barista / left-handed line — takes colour `#8F702A`.

Bio copy is in `CONTENT-NOTES.md` and on the live mockup. It is the client's own supplied biography — do not paraphrase it.

Responsive

Tablet and Mobile: set doc-block Direction to **Column**, both children to Width **100%**, and on **doc-photo** change the Custom CSS to `selector{aspect-ratio:16/9; position:static}`. Once the block is stacked there is no taller neighbour for the photo to travel against, so sticky must be switched off.

Four counters that animate up when they scroll into view.

```
Container stats-tray row · bg #E9E6DD · radius 16 · pad 10 · gap 10
└ Container stat-card ×4 bg #FFF · radius 12 · column
  └ Icon icon-tile
  └ Counter counter
```

Same tray as Step 4. Each card is **Padding Top 26 Right 26 Bottom 22 Left 26**, Width 25%, and holds the same stacked Icon tile from Step 5 plus one Counter widget.

Counter counter

Alignment, Title Position and Number Position are all on **Style > Counter** in Elementor 4.x. Satoshi is not a Google Font — if it is not installed on the site, use Inter 500 and nobody will notice.

Tab	Setting	Value
Content	Starting Number	0
Content	Ending Number	see table
Content	Number Suffix	see table
Content	Animation Duration	1800
Content	Title	see table
Style	Number > Typography	Satoshi or Inter · 34px · weight 500
Style	Number > Text Color	#1F2833
Style	Title > Typography	Inter · 14.5px · weight 400
Style	Title > Text Color	#5A6270
Style	Counter > Alignment	Left

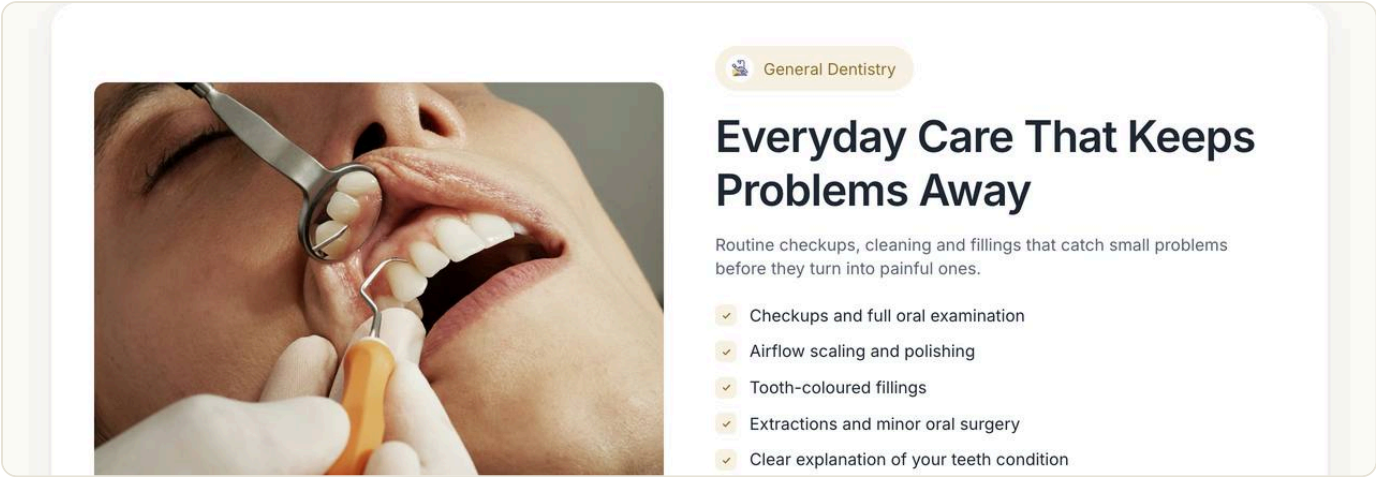

Ending	Suffix	Title
9	+	Years of Clinical Practice
8	—	Lumiere Branches in Malaysia
8	—	Treatments Offered
5	.0	Google Review Rating

The 5.0 trick. Elementor's Counter only counts whole numbers. Setting Ending Number 5 with the suffix .0 gives you a clean 0 → 5.0 count and reads exactly like the mockup.

Two of these four numbers are unconfirmed. "9+ years" is inferred from Dr Tan's 2016 graduation and "5.0" from the review screenshots. Both are flagged in `CONTENT-NOTES.md` — get the clinic to confirm before this page goes live.

Responsive

Tablet: stat-card Width 50%, Wrap on. **Mobile:** 100%.

Eight cards that pin at the top and let the next one slide over them. This is the signature effect of the page.

```

Read this before you build. The stacking is plain CSS `position: sticky` — **do not** use Motion Effects > Sticky, which is a different, JavaScript-driven thing and will not stack. Sticky also breaks if any ancestor has Overflow set to Hidden, so leave **services** and **svc-stack** on Default.

Container **svc-card**

Tab	Setting	Value
Layout	Direction	Row
Layout	Align Items	Center
Layout	Gap	48
Layout	Width	100%
Style	Background Color	#FFFFFF
Style	Box Shadow	0 10 30 -18 rgba(31,40,51,.25)
Advanced	Border Radius	24

Advanced	Margin	Desktop Top 0 Right 0 Bottom 28 Left 0 · Tablet Top 0 Right 0 Bottom 24 Left 0 · Mobile Top 0 Right 0 Bottom 24 Left 0
Advanced	Overflow	Default

selector{position:sticky; top:100px}

Container **svc-media**

Image widget inside: Resolution **Full**, Width 100%, Height 100%, Object Fit **Cover**.

Tab	Setting	Value
Layout	Width	50%
Advanced	Border Radius	12
Advanced	Overflow	Hidden

```
selector{aspect-ratio:4/3}
```

Container **pill**

Image inside = the matching file from **assets/icons** , Width **26px**. Heading beside it = tag p, Inter 15px, colour **#8F702A** .

Tab	Setting	Value
Layout	Direction	Row
Layout	Align Items	Center
Layout	Gap	9
Layout	Width	Custom → fit the content
Style	Background Color	rgba(212,178,96,.16)
Advanced	Border Radius	100
Advanced	Padding	Top 8 Right 16 Bottom 8 Left 10
Advanced	Margin	Top 0 Right 0 Bottom 18 Left 0

Icon List **checklist**

Icon List has no Text Indent control in 4.x — the spacing you want is **Style › Icon › Gap**.

Tab	Setting	Value
Content	Layout	Default (vertical)
Content	Items	Five, from the table overleaf
Content	Icon (each item)	Check
Style	List › Space Between	12
Style	Icon › Color	#8F702A
Style	Icon › Size	13
Style	Icon › Gap	12
Style	Text › Typography	Inter · 15.5px
Style	Text › Color	#1F2833

Tab	Setting	Value
Content	Text	Book This Treatment
Content	Link	WhatsApp URL with that treatment named — see overleaf
Content	Icon	Arrow Right · After
Style	Background (Normal)	#33485C
Style	Background (Hover)	#26394B
Style	Text Color	#FFFFFF
Style	Border Radius	8
Style	Padding	Top 12 Right 22 Bottom 12 Left 22
Advanced	Margin	Top 26 Right 0 Bottom 0 Left 0

Then duplicate seven times

Build card 1 completely, then right-click **svc-card** → Duplicate × 7 and change only the content. On cards **2, 4, 6 and 8** set Layout › Direction to **Row Reversed** so the photo alternates sides.

Mobile: set svc-card Direction to **Column** for all eight, Gap **18**, and both children to Width **100%**. Row Reversed on mobile would put the photo below the text, so on the reversed cards set Direction to **Column** too (not Column Reversed).

Pill label, icon file and photo on the left; heading, description and the five checklist items on the right (separated by /).

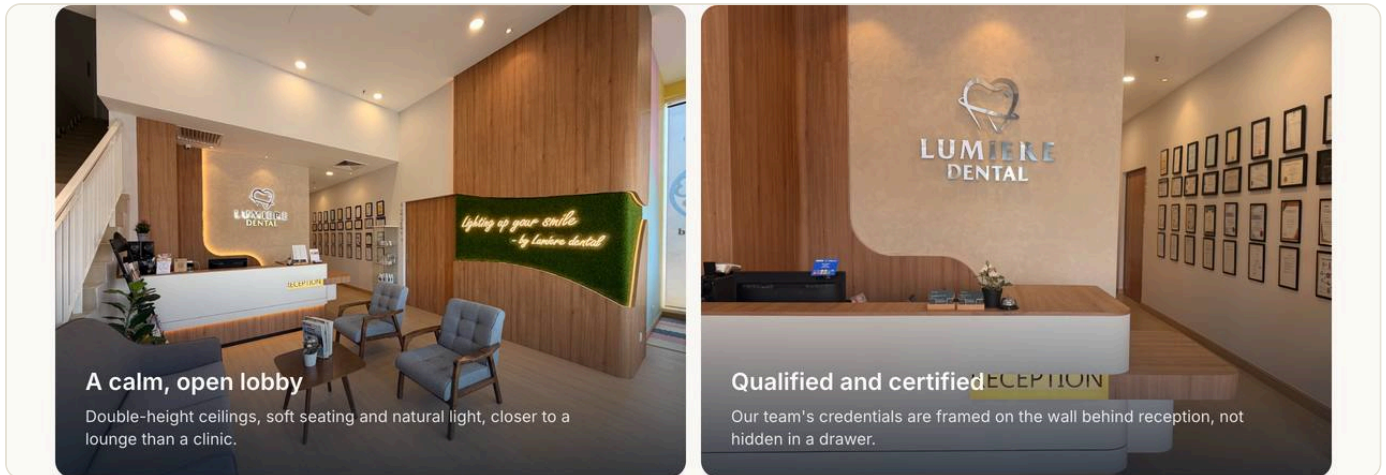

#	Pill / files	Copy
1	General Dentistry  	Everyday Care That Keeps Problems Away Routine checkups, cleaning and fillings that catch small problems before they turn into painful ones. Checkups and full oral examination / Airflow scaling and polishing / Tooth-coloured fillings / Extractions and minor oral surgery / Clear explanation of your teeth condition
2	Teeth Whitening  	A Brighter Smile, Safely Done Professional whitening that lifts years of coffee, tea and teh tarik stains without damaging your enamel. Shade assessment before we start / In-clinic professional whitening / Take-home whitening kits / Enamel-safe, dentist-supervised / Advice on keeping the result
3	Dental Implants  	Replace Missing Teeth for Good An implant restores a missing tooth from the root up, so you can bite and speak normally again. X-ray assessment and planning / Single and multiple tooth implants / Natural-looking implant crowns / Step-by-step timeline explained upfront / Follow-up care after placement
4	Invisalign / Clear Correct  	Straighten Your Teeth Without Braces Clear removable aligners that move your teeth quietly, so most people never notice you are in treatment. Digital assessment and treatment plan / Nearly invisible custom aligners / Removable for meals and brushing / Fewer clinic visits than fixed braces / Retainers to hold the final result
5	Braces  	Classic Braces, Expertly Fitted Fixed braces remain the most reliable way to correct crowding and bite problems, planned by a dentist with postgraduate orthodontic training. Orthodontic assessment and records / Metal and ceramic bracket options / Crowding, spacing and bite correction / Regular adjustment appointments / Retainers once braces come off
6	Root Canal Treatment  	Save the Tooth Instead of Losing It Dr Tan's focus is preserving natural teeth. Root canal treatment here is methodical, explained clearly, and painless. Assessment and honest advice first / Treatment focused on saving the tooth / Proper numbing and a patient pace / Every step explained as it happens / Crown options to protect the result
7	Crown & Bridges  	Restore Damaged Teeth to Full Strength Crowns protect what remains and bridges close the gaps, matched in shade so the repair disappears into your smile. Crowns for cracked or weakened teeth / Bridges to replace missing teeth / Shade matching to your natural teeth / Precise fitting over multiple visits / Care advice to make them last
8	Smile Makeover  	A Complete Plan for the Smile You Want When more than one thing needs fixing, a makeover combines the right treatments into a single plan with one clear outcome. Full smile assessment and goals / Combines whitening, veneers and alignment / Treatment sequenced in the right order / Costs and timeline agreed upfront / Reviews at every stage

Each button links to WhatsApp with the treatment pre-written into the message, so the front desk knows what the enquiry is about before they reply. Pattern:

[https://wa.me/601116083188?](https://wa.me/601116083188?text=Hi%2C%20I%27d%20like%20to%20ask%20about%20TREATMENT%20at%20Lumiere%20Kota%20Warisan.)

[text=Hi%2C%20I%27d%20like%20to%20ask%20about%20TREATMENT%20at%20Lumiere%20Kota%20Warisan.](https://wa.me/601116083188?text=Hi%2C%20I%27d%20like%20to%20ask%20about%20TREATMENT%20at%20Lumiere%20Kota%20Warisan.)

Replace **TREATMENT** with the pill label, using %20 for each space.

Two columns. Each column has one landscape card and one portrait card, so both columns end level.

```
Container facilities          Boxed 1250 · column (CSS ID: facilities)
├ Container sec-head
└ Container fac-grid         row · gap 14
  ├── Container fac-col-1    column · gap 14 · width 50%
  │   ├── Container card-lobby 4:3
  │   └ Container card-kids   3:4
  └ Container fac-col-2      column · gap 14 · width 50%
      ├── Container card-reception 4:3
      └ Container card-neon      3:4
```

Container card-lobby

Tab	Setting	Value
Layout	Direction	Column
Layout	Justify Content	End
Layout	Width	100%
Style	Background Image	lobby-reverse.jpg
Style	Background Size	Cover
Style	Background Position	Center Center
Advanced	Border Radius	16
Advanced	Overflow	Hidden
Advanced	Padding	Top 0 Right 0 Bottom 0 Left 0

```
selector{aspect-ratio:4/3}
```

Inside each card, one **caption** container pinned to the bottom:

Container caption

Heading inside: h3, Inter 22px / 600 / #FFFFFF . Paragraph: tag p, 15px, #FFFFFF at 85%, Margin Top 7.

Tab	Setting	Value
Layout	Direction	Column
Layout	Width	100%
Style	Background Type	Gradient
Style	Color	rgba(16,28,42,.8) at 0%
Style	Second Color	rgba(16,28,42,0) at 100%
Style	Gradient Angle	0
Advanced	Padding	Top 90 Right 28 Bottom 26 Left 28

Then duplicate the card three times and set:

Card	Image	Ratio CSS	Heading
1	lobby-reverse.jpg	4/3	A calm, open lobby
2	kids-corner.jpg	3/4	A corner just for kids
3	reception.jpg	4/3	Qualified and certified
4	neon-wall.jpg	3/4	The smile wall

Cards 1 and 3 go in column one and two respectively; cards 2 and 4 sit beneath them. The 4:3 / 3:4 pairing is why the two columns finish at the same height — if you swap a photo, keep the ratio or the grid goes lopsided.

Responsive

Tablet and Mobile: fac-grid Direction **Column**, both columns Width **100%**. The four cards then run in one stream and keep their own ratios.

◆ How It Works

From WhatsApp to Follow-Up, Made Simple.

Four steps from your first message to a healthy smile, guided the whole way.

WhatsApp Us

Message 011-1608 3188 and the front desk will find a slot that fits you. The clinic fills up fast, so booking ahead beats walking in.

Consultation

Dr Tan checks your teeth, listens to your concerns and explains what she finds in plain language before anything is decided.

Treatment

Gentle, unhurried treatment with proper numbing and a running

The left panel holds still while the four steps scroll past it.

The five reviews

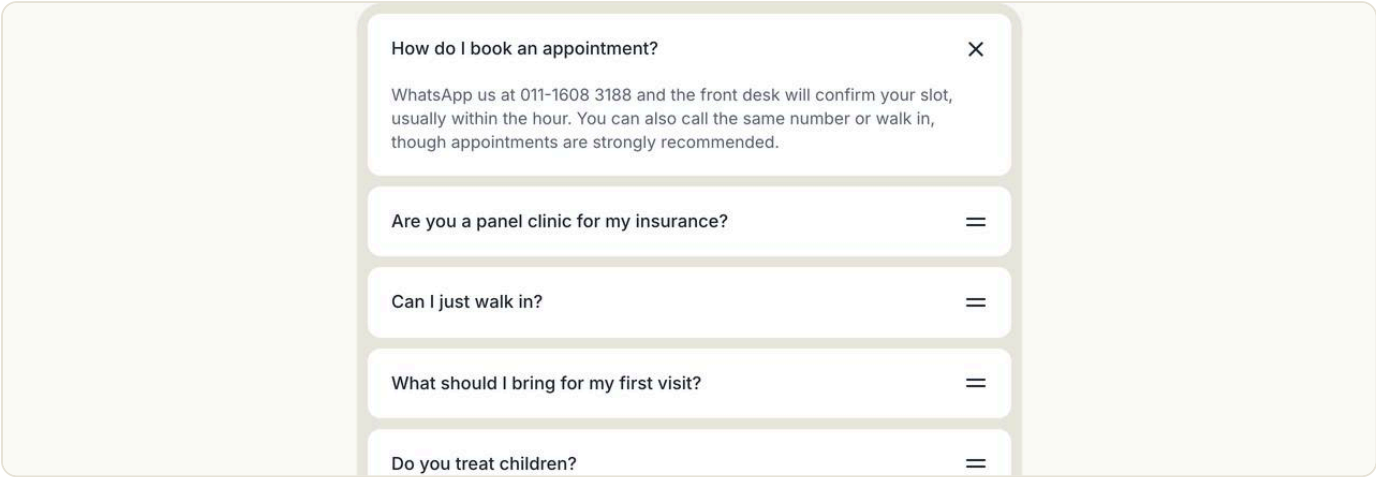

Quote	Name	Role line
Featured — "Two other clinics had suggested surgical removal. Dr Tan managed to remove it without any cutting. Truly painless, gentle, and very professional."	NSRN AMR	Google Review · Local Guide
"The airflow scaling is almost no pain. Great explanation from the dentist on my teeth condition. Most importantly it's near to where I stay."	Thomas Teh	Scaling patient
"I personally named her my tooth fairy. Honestly don't wait on it. It's painless if you are done at Lumiere Dental, Kota Warisan!"	Izzati Azahar	Root canal patient
"They accept all insurance companies, so no worries as they are most likely your panel clinic. Do make an appointment before coming in."	Allan Manan	Scaling patient
"Dr Tan Mei Wen is so thorough and informative, and lets us know every step of the way what's going on. Personalized, comfortable and stress-free."	Noorhafizah Abd Samat	Local Guide · 73 reviews

These are real Google reviews, retyped from the client's screenshots. Keep the wording and the names exactly as they are — do not tidy the grammar.

Small card: Star Rating, then quote (tag p, 15.5px, line 1.55, #1F2833 , Margin Top 18), then a Divider (Weight 1, Color #EFECE3 , Gap 20), then name (15px / 600 / #1F2833) and role (14px / #5A6270).

Responsive

Style	Items > Space Between	10

Question and answer

1 How do I book an appointment?

WhatsApp us at 011-1608 3188 and the front desk will confirm your slot, usually within the hour. You can also call the same number or walk in, though appointments are strongly recommended.

2 Are you a panel clinic for my insurance?

We are a panel clinic for AIA, PMCare, Mednefits, HealthMetrics and MedKad. Message us your insurer and policy details and we will confirm your coverage before your visit.

3 Can I just walk in?

Walk-ins are welcome when there is a free slot, but the clinic is fully booked most days. A quick WhatsApp before you come saves you the wait.

4 What should I bring for my first visit?

Bring your IC or passport, your insurance or panel card if you have one, and any previous dental records or X-rays. That's all we need to get you started.

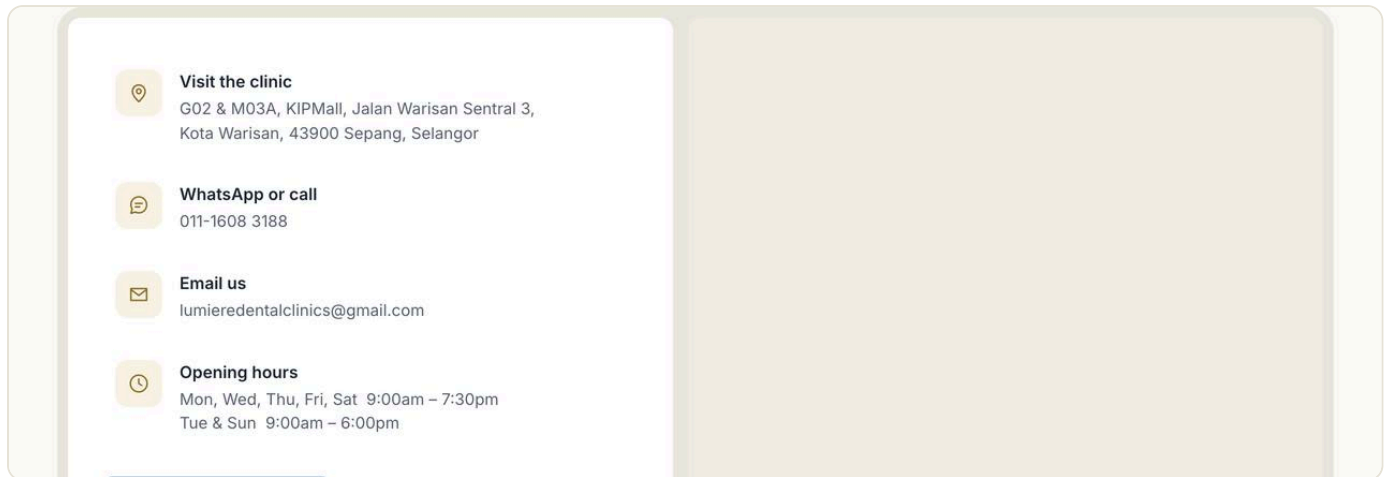

5 Do you treat children?

Yes. The clinic has a dedicated kids corner, and Dr Tan paces every appointment around the child rather than the clock.

6 Where exactly is the clinic?

G02 & M03A, KIPMall Kota Warisan, Jalan Warisan Sentral 3, 43900 Sepang, Selangor. We are on the ground floor of KIPMall, with plenty of parking outside.

The mockup animates the icon from three bars to an ×. Elementor's accordion has its own icon set — use Plus / Minus and accept the difference, it is not worth custom code.

Details on the left, live Google map on the right.

f-contact	Contact Us — email, phone, address, each with a small gold icon

Container	footer-bar
Left: © 2026 Lumiere Dental Clinic Kota Warisan. All rights reserved. Right: Klinik Pergigian Lumiere · 乐美牙科诊所. Both 14.5px / #5A6270 . The big Bottom padding on tablet and mobile keeps this line clear of the floating button.	

Tab	Setting	Value
Layout	Content Width	Boxed
Layout	Width	1250
Layout	Direction	Row
Layout	Justify Content	Space Between
Style	Border Type / Width / Color	Solid · Top 1px · #EFECE3
Advanced	Padding	Desktop Top 22 Right 30 Bottom 28 Left 30 · Tablet Top 18 Right 30 Bottom 88 Left 30 · Mobile Top 18 Right 20 Bottom 88 Left 20

The floating WhatsApp button

Elementor Pro has this built in. **Templates > Add New > Floating Buttons**, choose the WhatsApp type:

Tab	Setting	Value
Content	Platform	WhatsApp
Content	Number	601116083188
Content	Message	Hi Lumiere Dental Kota Warisan, I'd like to book an appointment.
Style	Background Color	#25D366
Style	Icon Color	#FFFFFF
Style	Size	58
Advanced	Position	Bottom Right · offset 24 / 24

Then set its Display Conditions to this page only, unless the clinic wants it site-wide.

Last: the entrance animations

The mockup fades each block up as it comes into view. Select each section's first-level container and set **Advanced > Motion Effects > Entrance Animation** to **Fade In Up**, Duration **Slow**. On grouped cards, add **Animation Delay** in steps of **100ms** across the row so they arrive one after another.

Done when: the page scrolls from a full-height hero to a full-width footer, the service cards stack as you scroll, and the WhatsApp button floats above everything.

- ☐ The hero is exactly one screen tall on a laptop and on a phone. If there is a gap under it on mobile, the `100dvh` line did not save.
- ☐ The service cards stack. If they scroll past each other normally, a parent container has Overflow set to Hidden — check **services** and **svc-stack**.
- ☐ The Dr Tan photo travels with the bio on desktop, and sits still on mobile.
- ☐ No sideways scrolling at 390px wide. Usually one container left at a fixed px width instead of 100%.
- ☐ Every WhatsApp link opens with the message pre-filled, and the eight service buttons each name their own treatment.
- ☐ The six menu links jump to the right section, and the header does not cover the heading when they land.
- ☐ Nothing is cropped. Compare each card against the live mockup — the ratios are deliberate.
- ☐ Opening hours confirmed with the clinic, not taken from this guide.
- ☐ The two stat numbers confirmed — "9+ years" and "5.0".
